

VISTA VKBD3i CONTROL KEYBOARD

FULL CONTROL AT YOUR FINGERTIPS

The VKBD3i keyboard controls all Vista RS485 enabled products, including DVRs, matrices, domes, fixed cameras and legacy equipment. The keyboard is simply and intuitively laid out with large, tactile keys, making it easy to understand and operate. It comes with a 3-axis joystick for precise variable speed pan, tilt and zoom dome control and is able to control multiple devices simultaneously.

Telemetry is automatically turned on as soon as the joystick is moved and the dual RJ45 sockets allow domes to be controlled directly from the keyboard itself.

Up to four keyboards can be connected and mounted locally to the DVR or up to 1.2km away using a suitable cable.
